Hi Stan

For some reason when I replied directly to your email I received an error message saying the email was not delivered.

I am pulling your address from my contact list...hopefully it goes through this time.

Thanks Stan

If we can't get a date in December we'll explore their sending another rep. In my email back to him on his original request to reschedule the meeting, I did ask if he couldn't have someone else handle the TOB meeting; he replied that as the PM he needed to attend. Ed seems to be pretty hands on with this project as the project manager. I have not been involved in any other calls/meetings with him where he has another NG rep; not sure if he pretty much relies on his contractors for all additional support, but we can check into this if necessary.

Doug,

The only two dates I would be available is December 6th or 16th. I agree it is important that Grumman is at the meeting. But if the other dates in December don't work for everyone why can't they send another representative? Please keep me posted.

Thank you,

Stan Carey, Superintendent
Massapequa Water District

Hi Stan

Unfortunately, late Friday night Ed Hannon sent me a message indicating that a conflict had come up for the Nov. 15 coordination meeting which will prevent him from attending. I asked for more info, and he does have a legitimate conflict (see below). It would probably be best if NG could make the meeting.

I asked DEC to keep the November 15th meeting on their calendars while we look for another possible date. Bob Schick sent an email to Nathan Graber (DOH) this afternoon asking which of the following dates he is available:

Tuesday Dec 6
Tuesday Dec 13
Friday Dec 16
Tuesday Dec 20

EPA, and DEC (including Martin Brand, a Deputy Commissioner) can make these dates, however it is critical that DOH be able to attend. Hopefully we will hear back from DOH tomorrow. I wanted you to be aware of this; I assume you would also think it is important to have NG participate in the meeting.

I hope to hear back from DEC/DOH tomorrow so that I can send a note out to the larger group asking if they are available for any of the dates Graber can make it. If I don't hear back about Nathan's availability by tomorrow I will send a note out to the larger group informing them of the situation and asking that they hold the four dates open.

If you think that it would be better to proceed with the meeting on the 15th even though NG cannot make it, let me know.

Thanks

Doug

- Letter from NYSDEC Commissioner Seggos dated March 17, 2016.
- Northrop Grumman OU3 RW 21 Remedial design Work Plan, June 2016

Doug / Peter

As you are aware at the direction of NYSDEC Commissioner Seggos Northrop Grumman is conducting the OU3 Off-site Ground Water (RW 21 Area) remediation work plan to an "expedited remediation schedule".

The RW 21 Area Work Plan calls for installing three extraction wells (RW 20, 21 & 22) , three to four vertical profile borings (VP13, 14, 15 16), below ground installation of the interconnecting pipe lines, pumps and controls, conduct an engineering assessment of the exist Arthur Ave recharge basin and potentially construct a second recharge basin as well as construction of a new dedicated treatment facilities and effluent discharge pipe, all as soon as possible.

All construction work is being conducted on Town of Oyster Bay property and requires Town Board approval. To date NG has received the Town of Oyster Bay's approval for the installation of four VPBs and two extractions wells (RW 21 & 22). However, three residents have objected to the installation of the RW 20 extraction well and associated pipe in the street on which they live. As a result, the Town has tabled the RW 20 permit application four times since July in Town Board Hearings and has changed the procedures for granting NG an easement agreement to construct the remainder of the treatment system.

The Town Board hearing to approve the RW 20 well and the easement agreement(s) is scheduled for 10 AM Tuesday November 15, 2016. Therefore, as the Project Manager I must attend this Board Hearing along with our design and construction contractors to support this procedure. Unfortunately there are no options to move this Town Board Hearing to another date.

For the reason that I just briefly summarized above I was hoping the EPA, DEC, DOH and other attendees could reschedule this quarterly meeting. Otherwise NG will not be able to attend.

Thank You
Ed Hannon

Hi Ed

This is unfortunate as all the other groups can send representatives to the meeting and if we try to reschedule it will definitely take us into December (the dates you have offered were not workable when we identified November 15th as a date that DEC/DOH/EPA could attend). Trying to schedule a meeting in December that will also require senior management from DOH will be difficult.

Can you let us know the nature of the conflict? Are you sure you can't have anyone else handle this for you?

Doug / Peter /Jim

Mike Wolfert and myself have a conflict with another meeting that we do not have the ability to have reschedule.

If you are able to reschedule we can be available on any of the following dates: November 9,17, 21,22.

Contact me if you require any additional information.

Thank You

Ed
